Front View

Speed: 40.27 km/

Navigation:

Continue straight

Reasoning under \mathcal{M}_{text}

Trees line both sides, and there are no cars in the immediate vicinity of the intersection. The speed is moderate at 40 km/h. The navigation command is to continue straight.

Reasoning Given the clear road ahead and lack of traffic, maintaining current speed and trajectory is logical. No turns or stops are necessary as the path remains straight. The moderate speed suggests steady driving without acceleration or deceleration.

Prediction

Based on this reasoning, the appropriate actions are to keep the current speed and stay straight for all frames.
